

About IDECO Consults:

Established in 2012, IDECO Consults has emerged as a leading consulting firm, uniquely positioned at the intersection of civil and electrical engineering and project financing. With a proven track record in securing financing for a broad spectrum of projects, including both solar and conventional power initiatives, our firm has demonstrated exceptional capability in raising funds for projects valued up to N20 billion. This expertise not only underscores our technical prowess but also our financial savvy, ensuring the realization of projects that are both technically sound and financially sustainable, thereby driving sustainable development and energy independence for the communities we serve.

Our Services:

Civil Engineering Expertise: Since our inception, IDECO Consults has been delivering comprehensive services in civil engineering, ranging from detailed project planning and innovative design to meticulous management. Our diverse project portfolio showcases our involvement in infrastructure development, urban planning, and more, all marked by our commitment to excellence and sustainability.

Electrical Engineering Innovations: Specializing in the design and implementation of mini-grid projects, we are at the forefront of providing reliable, sustainable energy solutions. Our dedication to electrical engineering innovations aligns with our goals to reduce carbon footprints, integrate renewable energy sources, and promote sustainable practices across all projects.

Project Financing Solutions: Our unmatched ability to secure financing for a wide array of engineering projects, including significant engagements in the solar and conventional power sectors, sets us apart. Navigating the complex landscape of project financing, IDECO Consults ensures the seamless execution and fruition of high-value projects, leveraging our deep understanding of financial mechanisms and funding sources.

Key Achievements:

- Implementation of multiple successful mini-grid projects since 2012, significantly enhancing energy accessibility and reliability.
- Recognized expertise in the integration of renewable energy, leading to notable reductions in carbon emissions and the promotion of sustainable development.
- A distinguished track record in project financing, evidenced by our ability to facilitate the execution of projects, including those valued up to N20 billion.

Our Collaborative Approach:

Adhering to a philosophy of collaboration, IDECO Consults engages closely with clients, stakeholders, and communities to tailor each project to meet specific needs and objectives. Our team, composed of seasoned engineers and financial experts, employs innovative strategies and leverages advanced technology to achieve exceptional outcomes. Our commitment to transforming communities through efficient and sustainable energy solutions epitomizes our approach, marrying engineering excellence with financial viability and setting us apart as industry leaders since 2012.
